

## **SPLASHBACK INSTALLATION, CARE AND MAINTENANCE**

### **DESCRIPTION**

Splashbacks are made from thermally toughened glass which is 5 times stronger than normal glass and can withstand temperatures of up to 250 degrees Celsius.

- Glass conforms to BS 12150-1:2000.
- Glass edges are polished for safe handling and enhanced appearance.
- Glass is painted with a 2 part paint containing a special glass adhesive and curing agent and is baked on.

### **HANDLING AND STORAGE**

- Glass should be stored in dry conditions; rainwater can contain traces of corrosive chemicals which can cause blemishes on the surface of the glass.
- Glass should be stacked upright and supported in a manner that prevents sagging.
- Glass should be stacked on a soft surface such as wood, felt, rubber etc.
- Upon receipt and before glazing, each piece of glass should be checked for damage; damaged glass should not be glazed.

### **INSTALLATION**

Splashbacks are installed using mirror adhesive which will not affect the painted surface on the reverse of the glass.  
Edges are finished using a neutral curing silicon.

## **MAINTENANCE**

Splashbacks should be cleaned with a soft, non-abrasive cloth and mild, non-abrasive cleaning solutions.
